

**The Invasive Plants Working Group of EWRS invite you to  
workshop “our path after covid-19”**

**September 23-24, 2021  
Palic, Serbia**

We are today in a totally changing world due to pandemic and unbelievable advances in technology and science. There are many questions born from the current situation. In the last two years, we moved less, even we become more independent to online life including our daily habits. Climate change is still threatening all world with its predicted and unpredictable results. Unmanned vehicles, robots and robotics are becoming part of our life more and more day by day. Artificial intelligence and other related issues invading our life and occupying our jobs/works as well. The questions for our WG are how invasive alien plants will behave, how will we proceed to deal with invasive alien plants, how much new advancements mentioned above will affect our subjects, so on. Our first meeting after Covid-19 will be a workshop and focus on our new pathway.

The meeting will accept presentations on two main area: One is advancements and history of invasive alien plants, their control, policies, and science. The second one will be what can be our contribution to sustain world with our works on invasive alien plants and how can we include new advancements in our works. We will have brainstorming sessions to be more active in weed science and invasion science activities. We hope that we can come up with some common projects and activities to find out our path together. Could you please send your abstracts (max. 250 words) to Ahmet at [ahuludag@yahoo.com](mailto:ahuludag@yahoo.com) (Put subject “Palic abstract”) not later than September 1.

We are aware that this is very short notice. We believe most of you can contribute to workshop to reach its aim without a presentation because brainstorming sessions will give chance all of us to express ourselves.

Palic is a small town in Vojvodina, Serbia. We think that this peaceful environment will help us to have a healthy meeting.

The fee for workshop will be € 50 and will be paid at side.

There will be support from EWRS for early career scientists. Rules will be announced soon.

We hope see you all in Palic.

Ahmet ULUDAG
