The abstract should be written in a single paragraph with a maximum of 400 words. Do not include figures, graphs, images, tables, diagrams or references. Abstracts should clearly state (proportionately): A brief description of the subject matter background, the rationale or hypothesis, and objectives; the methods briefly discussing the design of the study and how it was conducted; the results and pertinent discussion; and the conclusion limited to what the data directly support. Use the international system of units (SI). All biotica (crops, plants, insects, etc.) should be identified by their scientific names. Use italics for Latin names including scientific names, do not underline. Use common names for crops. Common names for weeds may be indicated only once in parenthesis after mention of the scientific name. Subscripts and superscripts should be clear. Levels of statistical significance which can be mentioned without further explanation are: *P <0.05, **P <0.01 and ***P <0.001.
